## 1. Contents of the ATLA RELIGION Database and ATLASerials Collection

### What journals are being digitized in the ATLAS project?

ATLA Religion Database and ATLASerials indexes over 600 of the leading journals in the field of religion and theology. These journals may be divided into the following six areas: (1) Bible, Archaeology, and Antiquities; (2) Theology, Philosophy, and Ethics; (3) Religions and Religious Studies; (4) Pastoral Ministry; (5) History, Missions, and Ecumenism; and (6) Human Culture and Society. The ATLAS Project includes journals in each of these categories.

Some of the publishers of journals in the ATLAS Collection have asked us to maintain a gap of from one to five years between the most recent print publication and the appearance of digitized versions of those issues online. Gaps are indicated in the list below following the name of the journal.

- ## 2. Proquest Religion database - Full-text starting date averages from 1997 to date.
- Some are from 1992 onward, and others from 1995 onwards.
